

◆ Laser Marking

Most of Dalicap products are identified by laser marking technology. Generally it can be visually observed. Under the normal storage and application, the marking won't be disappeared.

Dalicap applies different kind of laser marking method towards different size of capacitors. See the below tables for detail.

Capacitor Series	10A/70A	10B/70B	10C/70C	10E/70E
Example				
Meaning	101 : 100pF	D : Dalicap 102 : 1000pF	DLC : Dalicap 222 : 2200pF	DLC : Dalicap 561 : 560pF

Capacitor Series	70F	70G
Example		
Meaning	DLC70F: Dalicap 70F Series Capacitor Capacitance : 560pF Tolerance: ± 5% WVDC: 3000V	DLC70G: Dalicap 70G Series Capacitor Capacitance : 560pF Tolerance: ± 10% WVDC: 5000V

If the customer needs special laser marking, please contact Dalicap directly.
